NEW REGULATOR VALVE APPROVED FOR USE IN HET B4050 and B4500 SERIES HEATERS INSTALLED IN PIPER PA-31-350

Hartzell Engine Technologies LLC (HET) has released a new regulator shut-off valve for use in HET P/N 65D79 series heaters. The new valve part number P23D04-7.5 replaces old valve P/N A23D04-7.5 and is approved for use in the heater assemblies listed. The new regulator shut-off valve incorporates design features that improve regulator performance and is rated for a higher operational pressure of 60 psig.

For questions concerning installation eligibility and availability of the new regulator shut-off valve, please contact Hartzell Engine Technologies, Technical Service Department at (888) 461-6077.
